

R E M A R K S

The above amendment is submitted to place the application in condition for allowance and in response to the Examiner's Action, paper number 3.

In that Action, the Examiner objected to the drawings as not showing every feature of the invention. Specifically the Examiner stated that the fourth and third plates were not depicted in the drawings. Applicant points to Fig. 2 in which the third plate 54 and the fourth plate 56 are shown. It is believed that the drawings do show these features and it is requested that the Examiner's objection be withdrawn.

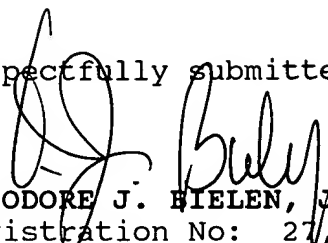

In addition, the Examiner raised objections under 35 U.S.C. §112 to the claims. Applicant has cancelled claims 1-12 and submitted claims 13-20 which are believed to overcome the indefiniteness objections raised by the Examiner.

In addition, the Examiner rejected claims 1-3 as being anticipated by Mehls. Claims 1 and 7 were rejected as being anticipated by Zahn et al.

Claims 4-6 and 8-12 are believed to contain allowable subject matter. Applicant's new independent claim 13 is believed to include the subject matter of originally submitted claims 1-4. In addition, independent claim 16, newly submitted, is intended to include all the limitations of originally submitted claim 1, 7, and 8. Thus, it is believed that the newly submitted independent claims as well as the claims dependent thereupon, are in condition for allowance.

The passing to issue of the newly submitted claims at an early date is earnestly solicited.

Respectfully submitted,

THEODORE J. BIELEN, JR.
